SAP® Enable Now Document Conversion

Abreon's Enable Now Vacuum Services

Key Benefits

- Ensure Success with Current-State Analysis
- Migrate the Right Content in Order of Priority
- Ensure Content is Accurate and Up-To-Date
- Support the Change with End-User Communications

Challenge

As organizations undergo digital transformations, their people are constantly having to adapt to new business processes. SAP Enable Now provides a single, comprehensive tool to help create, maintain, and deliver performance support, learning material, and documentation content—providing your employees with the knowledge they need to succeed exactly where and when they need it.

Transitioning to SAP Enable Now has the advantages of advanced, relevant functionality and increased flexibility with SAP solutions. However, many companies have a significant amount of eLearning content created in other systems, such as Ancile uPerform, that must be migrated over to SAP Enable Now to avoid having to spend time and money recreating the existing content.

Solution

Abreon provides end-to-end support to organizations implementing SAP Enable Now and has been named the preferred SAP partner providing content conversion services. Abreon's Enable Now Conversion offering is a turnkey solution for customers migrating from Ancile uPerform and Oracle UPK to SAP Enable Now.

Transisiton Strategy and Plan → Content Assesement → Conversion → Branding and Communication → Deployement to End-User Community

To start the transition, Abreon's experts team with organizations to conduct planning, analysis, and design around the implementation of SAP Enable Now. Our consultants provide guidance and develop a design document for options, configurations, and

Abreon Capabilities

- End-User Enablement
  - Microlearning
  - Performance Support
- Localization & Translation
- Social Learning & Online Communities
- Performance Improvement

customizations of SAP Enable Now based upon best practices and the requirements of each business. Abreon's team develops a governance plan, style guide, and standards.

Abreon's team builds an assessment of the existing content to confirm uPerform documents are accurate and up-to-date. We help to set a priority for converting uPerform documents based on frequency of use, performance gaps, impacted audiences and business functions, and more.

The conversion process includes rebuilding the uPerform site hierarchy into the new SAP Enable Now library. Automated and manual updates are performed to confirm uPerform and non-uPerform files are successfully published in the library. Extensive eLearning courses are redeveloped in the Enable Now tool.

Abreon supports each organization with branded communications to their uPerform and UPK users around the value of SAP Enable Now, why it is replacing these existing systems, and what users can expect from the change.

Results

With SAP Enable Now's advanced performance support and training capabilities, organizations can improve productivity, user adoption, and the end-user experience—resulting in lower costs, increased compliance, and a higher-performing workforce. Teaming with Abreon speeds the time to success, improving employee competence and confidence by helping people develop the skills they need to master the change.
