Office 365 and Sharepoint Development

If you have an Office 365 license for your enterprise, you have access to an incredibly powerful suite of collaborative technology. It can be used to make your organization work more efficiently and effectively, but, if you are like most organizations you're probably not sure how to use all of this capability and you don't have a team of experts to help you.

Except, you do.

Abreon's Digital Solutions team can help you take full advantage of the capabilities in Office 365 and SharePoint. We work with you to build integrated solutions across the Office 365 suite and to utilize the unique capabilities of SharePoint to put information, analytics, and process automation at your users' fingertips.

Our team will work with you to create modern web and mobile solutions using the features of Office 365 and SharePoint. Whether you need a branded site to house organizational information, dashboards for key company information, a centralized location to manage forms and approvals, or personalized portals to enterprise applications, we can help!

In addition to our design and development services, Abreon can also provide strategic consulting services including process redesign and automation, creative user engagement strategies, training, and documentation. We can provide our services on a project basis or as a managed service where all of your SharePoint needs, including user administration, troubleshooting, end-user support, and continuous improvement are provided for one monthly cost.

If you have an on-premise deployment of SharePoint and would like assistance evaluating a migration to SharePoint Online, we can help you determine the feasibility and benefits of the migration, and assist with the migration itself.

Find out what you could be doing with Office 365 and SharePoint, call Abreon today.
